

Follow-Up Technical Assistance Menu

Community Pedestrian and Bicycle Safety Training

Follow-up support is available to all past CPBST sites. Support includes a variety of technical assistance intended to support the community's implementation of programs, projects, and recommendations outlined in their community's CPBST Summary & Recommendations Report. This menu serves as a guide to potential follow-up technical assistance support available.

Community Leadership & Train-the-Trainer Workshops

Community residents are experts of their own lived experiences. Transfer technical skills to communities through the following workshops:

- How to Conduct a Walking Safety Assessment
- Engaging Agency Staff, Elected Officials, Schools, Community Based Organizations, Businesses, Faith-Based Organizations, and Residents

Strengthening Data-Driven Narratives

Expand your knowledge of tools and methods for collecting data to inform planning, policy, and decision-making processes through the following:

- On-Bike Safety Assessment
- Street Story Training
- Transportation Injury Mapping Systems (TIMS) Training
- Pedestrian and/or Bicycle Counts
- PhotoVoice and VideoVoice Training

Capacity Strengthening

Expand the capacity of municipal staff, community-based organizations, residents, and elected officials with the following trainings:

- Temporary Demonstration Project Training
- Safe Routes to School Training

To inquire about follow-up support for your community, please contact Program Manager Marina Ramirez at marina@calwalks.org.

Funding for this program was provided by a grant from the California Office of Traffic Safety, through the National Highway Traffic Safety Administration.

CPBST Follow-up Technical Assistance Descriptions

Community Leadership & Train-the-Trainer Workshops

Community residents are experts in their own lived experiences. Transfer technical skills to communities through the following workshops:

- **Walking Safety Assessment:** A training to teach local leaders how to conduct an assessment along a predetermined route to identify safety concerns and opportunities for people who walk.
- **Engaging Agency Staff, Elected Officials, Schools, Community Based Organizations, Businesses, Faith-Based Organizations, and Residents:** A discussion of how community organizations and residents can effectively engage or strengthen relationships with agency staff and elected officials. Potential topics include strategies for: contacting and working with agency personnel, framing issues/concerns, advocating for safety improvements and more.

Strengthening Data-Driven Narratives

Expand your knowledge of tools and methods for collecting data to inform planning, policy, and decision-making processes through the following:

- **On-Bike Safety Assessment:** An in-person bike ride along a predetermined route to identify biking safety concerns and opportunities with League of American Bicyclists Cycling Instructors (LCIs).
- **Street Story Training:** A demonstration of the Street Story tool and discussion with participants about their walking and biking experiences in their community. This include a hands-on session to report information about crashes, near-misses, general hazards, and safe locations to travel.
- **Transportation Injury Mapping Systems (TIMS) Training:** A training that demonstrates how to use TIMS, including making crash queries and analyzing results. The emphasis will be on making participants comfortable using TIMS. It is a free tool used to access California's crash data, the Statewide Integrated Traffic Records System (SWITRS).
- **Pedestrian and/or Bicycle Counts:** An interactive training to measure bicycle and pedestrian traffic at a specific location during a particular time of day. These counts are useful for allocating resources for safety enhancements.
- **PhotoVoice & VideoVoice Training:** An interactive training on using images and/or videos to describe experiences, communicate perspectives, and raise awareness of safety issues.

Capacity Strengthening

Expand the capacity of municipal staff, community-based organizations, residents, and elected officials with the following trainings:

- **Temporary Demonstration Project Training:** An interactive training to support the installation of short-term safety enhancements that allows community residents to experience and give feedback before the project is permanently installed.
- **Safe Routes to School Training:** An interactive training to support the development and/or implementation of components of a Safe Routes to School program. Potential topics include safe passage programs, walk/bike to school day, walking school bus and bike train programs, student safety patrols, and school arrival/dismissal observations.
