

Tribal Transportation Safety Assessment (TTSA) Program

Apply Now for an In-Person Tribal Transportation Safety Assessment (TTSA)!

We are accepting applications for conducting Tribal Transportation Safety Assessments (TTSAs). Funded by the California Office of Traffic Safety (OTS), through the National Highway Traffic Safety Administration (NHTSA), TTSAs are **FREE** to California Tribes.

TTSA studies are conducted by transportation safety experts to assist Tribal staff and leadership plan and prioritize safety improvements for all travel modes (walking, bicycling, transit, driving) on Tribal roads and pathways, and on roads accessing Tribal lands. Tribal staff can also use the TTSA reports in support of funding applications. TTSAs include:

- Crash data analysis
- Community engagement survey to understand transportation choices, challenges and opportunities (On-line and/or printed)
- One-day on-site field visit by a safety expert, in collaboration with Tribes, on or near Tribal lands to conduct a walk or drive audit around areas of concern (intersections, corridors, paths, or routes including walk/bike to schools)
- Detailed illustrated report of findings with analyses, suggestions and concepts

NEW Virtual TTSA - This option is also available to bring a transportation safety assessment to your community!

We are excited to share that we are now offering Tribes the additional option to apply for a virtual Tribal Transportation Safety Assessment (TTSA) tailored to the specific transportation safety needs of their community. The Virtual TTSAs will be conducted by SafeTREC safety evaluators and focus on the same activities as the in-person assessments. Instead of an in-person field audit, the assessment will be conducted utilizing Google Map and StreetView.

NEW TTSA Tutorial Presentations - "How to Conduct a Transportation Safety Assessment for your Tribe"

These on-line live presentations can be requested by any interested Tribe for their staff and scheduled during August and September of 2023. During these 1 to 2-hour presentations, our transportation safety experts will provide information about transportation safety topics. Starting October 01, 2023, we will send recorded video presentations to you upon request. Topics may include:

- Safe System Principles
- Crash data collection
- Community engagement with Tribal communities
- How to identify transportation safety issues and focus areas for safety assessments in your Tribe
- How Tribal staff can conduct transportation safety audits and utilize best known safety countermeasures

Apply for the 2023 TTSA Program

To apply for any of the above opportunities for your community, please complete [the application](#) and submit it to safetrec@berkeley.edu.
