SafeTREC is a University of California, Berkeley, research center affiliated with the Institute of Transportation Studies and the School of Public Health.

SafeTREC conducts research, provides graduate-level courses, coordinates major transportation safety programs for the State of California, and conducts technical assistance.

Our mission is to reduce transportation-related injuries and fatalities through research, education, outreach, and community service.

Funding for this program is provided by a grant from the California Office of Traffic Safety, through the National Highway Traffic Safety Administration.
