

# Berkeley SafeTREC

SAFE TRANSPORTATION RESEARCH AND EDUCATION CENTER

## FREE Tribal Transportation Safety Assessments (TTSA) NOW ACCEPTING APPLICATIONS

UC Berkeley SafeTREC is inviting 10 California tribes to apply for the next round of **Tribal Transportation Safety Assessments**, beginning November 2021 and to be completed by mid-June 2022. TTSA reports can help tribal staff and leadership **plan and prioritize safety improvements** for all travel modes (walking, bicycling, transit, driving) on tribal roads and pathways, and on roads accessing tribal lands.

Funded by the Robert Wood Johnson Foundation (RWJF), these engagements are **FREE** to California tribes.

### TTSA engagements include:

- **Collision data analysis** by SafeTREC staff
- Community engagement **survey** to understand household transportation choices, challenges and opportunities. (On-line and/or printed)
- With Tribal staff, selection of several **focus (study) areas** on or near Tribal lands. (intersections, corridors, paths, or routes including walk/bike to schools)
- One-day on-site **field visit** by a safety expert (walk-audit / drive-about)
- Detailed **illustrated report** of findings with analyses, suggestions and concepts

### To apply, or for more information, contact:

### Background

Since 2015 SafeTREC has conducted 32 transportation safety assessments for California Tribes. The TTSA program is just one of SafeTREC's free resources for California tribal communities. Others include **Tribal Street Story** – a map-based “crowdsourcing” tool for gathering community input, and Tribal **Transportation Injury Mapping System (TIMS)**, a map-based crash data search and visualization tool.
