Join us to learn more about how to build your capacity in organizing resident-led walking and biking groups and how to connect this work to informing traffic safety improvements in your neighborhood. During this summit you will also learn more about safe routes to school and ways to make walking and biking to and from school safer, convenient and fun. Together with other community members, parents, city representatives and school staff, you will identify barriers to walking and biking and opportunities for improvements. You will leave the workshop ready to work with your community partners in Fresno.
